Toronto, Ontario – January 9, 2024 – OreCAP Invest Corp. (the "Company" or "OreCAP") (TSX.V:OCI | OTC: ORFDF) is pleased to announce that QC Copper and Gold (QCCU:TSXV | OTC:QCCUF), an OreCAP portfolio company in which it owns 5 million shares, released an updated Mineral Resource Estimate (MRE) for the Opemiska Project in Quebec's Chapais-Chibougamau District. This MRE reflects a significant increase in grade and contained metal, attributed to extensive drilling and QC Copper's technical team's two-year recompilation and reinterpretation of geological data. Significant qualitative improvements within the project's geological model have also been made. With this MRE, Opemiska has the highest copper grade among open pit copper deposits, with over 1 billion pounds of copper contained in Canada.

Full Details on QC Copper's updated MRE can be found on QC Copper's news release:

About QC Copper and Gold and the Opemiska Copper Complex

The Opemiska Copper Complex is adjacent to Chapais, Quebec, within the Chibougamau district. Opemiska is also within the Abitibi Greenstone Belt and within the boundaries of the Province of Quebec's Plan Nord, which promotes and funds infrastructure and development of natural resource projects. The 100%-QC Copper owned Opemiska Property covers 24,544 hectares and includes the past-producing Springer, Perry, Robitaille and Cooke mines, previously-owned and operated by Falconbridge between 1953-1991. The project hosts excellent on-site infrastructure, including a power station and direct access to Highway 113 and the Canadian National Railway. The Cooke and Robitaille Mines are situated on the Cooke-Robitaille option claims and QC Copper is working through its obligations regarding the option and has the financial resources and expects to exercise the option in due course. All the other claims that comprise the Greater Opemiska Project are wholly-owned by QC Copper and Gold Inc.
